SUMMARY

Computer Science student at Effat University (GPA 3.99/4.00) with a strong foundation in programming, algorithm analysis, and software development with hands-on experience in building Cybersecurity and AI projects. Proven ability to lead teams and manage multiple projects at once. Actively seeking a Computer Science internship.

EDUCATION & HONORS

Effat University **Jeddah, Saudi Arabia**
Bachelor of Science in Computer Science, Cybersecurity Track | GPA: 3.99 / 4.00 *June 2027*
President's List (2025/2026) – academic achievement by maintaining a GPA of 3.9 or higher across two consecutive semesters.
Dean's List (2023 - 2025) – academic achievement by maintaining a GPA of 3.75 or higher across two consecutive semesters.
Relevant Coursework: Governance Risk and Compliance , Computer Networks, Ethical Hacking, Cryptography and Network Security, Digital Forensics, Machine Learning, Deep Learning, Software Engineering, Artificial Intelligence.

EXPERIENCE

DevOps Engineer Intern | ConfidencEway (Remote) **Jan 2026 – Present**
- Assisted with CI/CD pipelines, cloud infrastructure, automation, monitoring, and troubleshooting to support reliable deployments and improve operational efficiency.

AI Red Teamer (Manager, Reviewer, Labeler) | AI Astrolabe (Remote) **Jun 2026 – Jul 2026**
- Labelled and reviewed dangerous Urdu prompts and responses to safety-test an AI language model.

PROJECTS

Temporal Digital Twin for Incident Reconstruction in Hybrid-Cloud Banking | Senior Capstone **Sept 2026 – Present**
Python, PostgreSQL, Neo4j, Docker, Wazuh
- Designing a temporal digital twin of a simulated hybrid-cloud banking environment that stores historical network, identity, permission, and policy states and retrieves the environment as it existed at a chosen timestamp.
- Developing an incident reconstruction and attack-path analysis approach that correlates security events with historical system states to rebuild multi-stage attack timelines and identify the paths an attacker could have used.

Web Application Penetration Testing **May 2026**
Kali Linux, Docker, WebSploit Labs, SQLMap
- Tested isolated vulnerable web apps for SQL injection and XSS, covering authentication bypass, database enumeration, and reflected and stored XSS, using manual and SQLMap-based methods.
- Recommended remediation in the form of prepared statements, output encoding, and CSP.

Web Application Penetration Testing **May 2026**
Python, XGBoost, SMOTE
- Built and compared six models on 71,515 patient encounters, using SMOTE and threshold tuning for class imbalance. Tuned XGBoost performed best (0.58 recall, 0.72 AUC-ROC)

TECHNICAL SKILLS

Security: Web application penetration testing, SQL injection, XSS, PCAP analysis, IDS tools, adversarial ML / data poisoning
AI & Data: Machine learning, XGBoost, SMOTE, data preprocessing and analysis, Google Colab
Cloud & DevOps: AWS (EC2, IAM, CloudWatch), Docker, security groups, monitoring and alerting, GitHub Actions, CI/CD security
Networking & Systems: TCP/IP, network segmentation, Wireshark, Kali Linux, VirtualBox
Programming Languages: Python, Java, C++, JavaScript, PHP, HTML, MySQL, Assembly, Bash

CERTIFICATIONS

CompTIA Security+ – In Progress — Ongoing Jan 2027
Python for Data Science, AI & Development – IBM — 2026
Introduction to Generative AI – Google Cloud — 2026
Digital Safety and Security – Arizona State University — 2025

LEADERSHIP & ACTIVITIES

Student Government Vice President - Effat University **2026-Present**
- Represent the student body in coordination with university administration, and help plan and run campus initiatives and events.

Nominee, Student Shura Council President – Effat University **2025-2026**
- Nominated for Queen Effat Citizenship Award to serve as Student Shura President and student-body representative.

College of Engineering Representative; Foodie's Club Leader – Effat University **2024-2026**
- Represent the college in Student Shura, presenting student concerns. Planned and executed events as club leader.
